Feminist Theology and the Challenge of Difference Margaret D. Kamitsuka, 2007-07-20 In the early years of contesting patriarchy in the academy and religious institutions, feminist theology often presented itself as a unified front, a sisterhood. The term feminist theology, however, is misleading. It suggests a singular feminist purpose driven by a unified female cultural identity that struggles as a cohesive whole against patriarchal dominance. Upon closer inspection, the voice of feminist theology is in fact a chorus of diverging perspectives, each informed by a variety of individual and communal experiences, and an embattled scholarly field, marked by the effects of privilege and power imbalances. This complexity raises an important question: How can feminist theologians respect the irreducible diversity of women's experiences and unmask entrenched forms of privilege in feminist theological discourse? In *Feminist Theology and the Challenge of Difference*, Margaret D. Kamitsuka urges the feminist theological community to examine critically its most deeply held commitments, assumptions, and goals—especially those of feminist theologians writing from positions of privilege as white or heterosexual women. Focusing on women's experience as portrayed in literature, biblical narrative, and ethnographic writing, Kamitsuka examines the assumptions of feminist theology regarding race and sexuality. She proposes theoretical tools that feminist theologians can employ to identify and hopefully avoid the imposition of racial or sexual hegemony, thus providing invaluable complexity to the movement's identity, and ultimately contributing to current and future Christian theological issues. Blending poststructuralist and postcolonial theoretical resources with feminist and queer concerns, *Feminist Theology and the Challenge of Difference* makes constructive theological proposals, ranging from sin to christology. The text calls feminist theologians to a more rigorous self-critical approach as they continue to shape the changing face of Christian theological discourse.

The New Yale Book of Quotations Fred R. Shapiro, 2021-08-31 A revised, enlarged, and updated edition of this authoritative and entertaining reference book—named the #2 essential home library reference book by the Wall Street Journal “Shapiro does original research, earning [this] volume a place on the quotation shelf next to Bartlett's and Oxford's.”—William Safire, New York Times Magazine (on the original edition) “The most accurate, thorough, and up-to-date quotation book ever compiled.”—Bryan A. Garner, Los Angeles Review of Books Updated to include more than a thousand new quotations, this reader-friendly volume contains over twelve thousand famous quotations, arranged alphabetically by

author and sourced from literature, history, popular culture, sports, digital culture, science, politics, law, the social sciences, and all other aspects of human activity. Contemporaries added to this edition include Beyoncé, Sandra Cisneros, James Comey, Drake, Louise Glück, LeBron James, Brett Kavanaugh, Lady Gaga, Lin-Manuel Miranda, Barack Obama, John Oliver, Nancy Pelosi, Vladimir Putin, Bernie Sanders, Donald Trump, and David Foster Wallace. The volume also reflects path-breaking recent research resulting in the updating of quotations from the first edition with more accurate wording or attribution. It has also incorporated noncontemporary quotations that have become relevant to the present day. In addition, The New Yale Book of Quotations reveals the striking fact that women originated many familiar quotations, yet their roles have been forgotten and their verbal inventions have often been credited to prominent men instead. This book's quotations, annotations, extensive cross-references, and large keyword index will satisfy both the reader who seeks specific information and the curious browser who appreciates an amble through entertaining pages.

Light and Obscurity in Symbolism Deborah Cibelli, Rosina Neginsky, 2016-01-14 The idea of light and darkness is one of the central ideas of the Symbolist movement, since this is a movement of contrasts. It encompasses the major themes of Symbolism, such as good and evil, beauty and ugliness, the visible and the invisible, and the divine and the earthly. This volume brings together a range of studies in order to understand the notion of light and darkness and a variety of its Symbolist interpretations. It also stresses the interdisciplinary nature of the concepts of light and darkness in Symbolism, as well as the cohabitation and symbiosis of both, which are together or separately at the core of this movement.

Economy, Difference, Empire Gary Dorrien, 2010-11-02 Sourcing the major traditions of progressive Christian social ethics social gospel liberalism, Niebuhrian realism, and liberation theology Gary Dorrien argues for the social-ethical necessity of social justice politics. In carefully reasoned essays, he focuses on three subjects: the ethics and politics of economic justice, racial and gender justice, and antimilitarism, making a constructive case for economic democracy, along with a liberationist understanding of racial and gender justice and an anti-imperial form of liberal internationalism. In Dorrien's view, the three major discourse traditions of progressive Christian social ethics share a fundamental commitment to transform the structures of society in the direction of social justice. His reflections on these topics feature innovative analyses of major figures, such as Walter Rauschenbusch, Reinhold Niebuhr, James Burnham, Norman Thomas, and Michael Harrington, and an extensive engagement with contemporary intellectuals, such as Rosemary R. Ruether, Katie Cannon, Gregory Baum, and Cornel West. Dorrien also weaves his personal experiences into his narrative, especially his involvement in social justice movements. He includes a special chapter on the 2008 presidential campaign and the historic candidacy of Barack Obama.

Leading With Intention Peter M. DeWitt, Michael Nelson, 2024-05-30 Deepen your connections with students, staff, and your larger community. Behind every thriving school or district are deeply interconnected teams that consistently engage in a reciprocal transfer of learning. Leading With Intention aims to make this process visible by helping leaders and teachers understand how their thinking impacts their decision-making and the overall well-being of their learning communities. Through five highly practical chapters, authors DeWitt and Nelson explore self-awareness, nurturing human interconnectedness, collective inquiry, establishing a learning network, and crafting a personal learning environment. Filled with research, stories, and places to process information, this timely book is focused on how educators think, the choices they make, and how they develop deeper academic and social-emotional connections. Other features include: Success criteria to help readers identify personal goals Suggested activities to apply knowledge Reflection sheets with guiding questions In-depth examples to illustrate content School-leaders will come away with a deeper understanding of the importance of self-awareness in leadership and the pedagogical knowledge required to focus initiatives on student learning. Leading with Intention helps education leaders go from being merely 'on task' to deeply engaged and reconnected with why they entered the education profession in the first place.

White Athena Walter Slack, 2015-06-26 Return to the fray of the Afrocentrist movement in the second volume of *White Athena*. Walter Slack follows up his first volume, which took to task those who claim that the Greeks and others stole their philosophy, science, and culture from black Africans arguing that the world needs to give credit to the right people. This volume is much less a comparison of diverse philosophies and cosmologies, and much more an evaluation of claims regarding imagined imports of technical, cultural, religious, and practical artifacts. Slack examines numerous Afrocentrist claims, including that cultural tutors from black Africa roamed early Europe, Muslim Spain, and pre-Columbian Mesoamerica and even traveled to ancient China with all sorts of cultural, intellectual, and scientific contributions. The author concludes that most damaging to the credibility of Afrocentrists is their willingness to adopt any and every theory that supports their ideological thesis of African cultural supremacy overtly or covertly based upon race. Open your mind to an honest and impartial view of world history with *White Athena*, Volume 2.

With Wings Extended Greg Hoch, 2020-05-04 A century ago, many people had given up on the wood duck, dooming it to extinction along with the passenger pigeon and Carolina parakeet. Today, it's one of the most familiar and most harvested ducks in the eastern half of the country, and one of America's great conservation success stories. In *With Wings Extended*, Minnesota conservationist Greg Hoch introduces readers to a duck they probably recognize but may not know well. This book shows how almost anyone can get involved in conservation and do something for wildlife beyond writing checks to conservation organizations. Hoch illustrates the complexities of wildlife and habitat management that landowners as well as state and federal wildlife agencies deal with on a daily basis, and takes readers through the life stages of what is largely

considered the most beautiful duck in the world. In this fascinating and practical read, Hoch blends the historical literature about the species with modern science, and also shows how our views of conservation have changed over the last century.

Apache Spark Deep Learning Cookbook Ahmed Sherif, Amrith Ravindra, 2018-07-13 A solution-based guide to put your deep learning models into production with the power of Apache Spark Key Features Discover practical recipes for distributed deep learning with Apache Spark Learn to use libraries such as Keras and TensorFlow Solve problems in order to train your deep learning models on Apache Spark Book Description With deep learning gaining rapid mainstream adoption in modern-day industries, organizations are looking for ways to unite popular big data tools with highly efficient deep learning libraries. As a result, this will help deep learning models train with higher efficiency and speed. With the help of the Apache Spark Deep Learning Cookbook, you'll work through specific recipes to generate outcomes for deep learning algorithms, without getting bogged down in theory. From setting up Apache Spark for deep learning to implementing types of neural net, this book tackles both common and not so common problems to perform deep learning on a distributed environment. In addition to this, you'll get access to deep learning code within Spark that can be reused to answer similar problems or tweaked to answer slightly different problems. You will also learn how to stream and cluster your data with Spark. Once you have got to grips with the basics, you'll explore how to implement and deploy deep learning models, such as Convolutional Neural Networks (CNN) and Recurrent Neural Networks (RNN) in Spark, using popular libraries such as TensorFlow and Keras. By the end of the book, you'll have the expertise to train and deploy efficient deep learning models on Apache Spark. What you will learn Set up a fully functional Spark environment Understand practical machine learning and deep learning concepts Apply built-in machine learning libraries within Spark Explore libraries that are compatible with TensorFlow and Keras Explore NLP models such as Word2vec and TF-IDF on Spark Organize dataframes for deep learning evaluation Apply testing and training modeling to ensure accuracy Access readily available code that may be reusable Who this book is for If you're looking for a practical and highly useful resource for implementing efficiently distributed deep learning models with Apache Spark, then the Apache Spark Deep Learning Cookbook is for you. Knowledge of the core machine learning concepts and a

basic understanding of the Apache Spark framework is required to get the best out of this book. Additionally, some programming knowledge in Python is a plus.
