[closed] People often say that percentages greater than 100 make no sense because you can't have more than all of something. This is simply silly and mathematically ignorant. A percentage is just a ratio between two numbers. There are many situations where it is perfectly reasonable for the numerator of a fraction to be greater than the denominator. *How to write numbers and percentage?* - *English Language* May 20, 2019 · In general, it is good practice that the symbol that a number is associated with agrees with the way the number is written (in numeric or text form).
