Cosmología moderna desde sus orígenes Emilio Elizalde,2022-02-16 No resulta difícil imaginar a nuestros ancestros contemplando admirados el maravilloso cielo nocturno. Y fue ya en la Antigüedad cuando empezaron a elaborarse las primeras teorías sobre los componentes constitutivos del universo, material y etéreo, que nos envuelve. Este libro se centra sobre todo en un punto concreto: investigar el momento en que la cosmología se convirtió por fin en una verdadera ciencia, en que las teorías sobre el cosmos devinieron teorías científicas. Eso no sucedió de la noche a la mañana, ya que fue un proceso lento, que ocupó gran parte del siglo XX y en el que intervinieron numerosos astrónomos, cosmólogos y teóricos de la física fundamental, con sus grandes aciertos y, en ocasiones, crasos errores. Todo este proceso se fundamentó en conciliar los datos empíricos obtenidos de las observaciones astronómicas (Leavitt, Slipher, Hubble) con un marco teórico muy sólido: la relatividad general de Einstein. Teoría que finalmente permitió (Friedmann, De Sitter, Lemaître) interpretar y entender los resultados obtenidos por los astrónomos. Visto en perspectiva, las aportaciones del pasado siglo tuvieron unas implicaciones extraordinarias, casi increíbles, que cambiaron por completo nuestra visión del universo: de ser pequeño, estático, inmutable y eterno pasó a ser enorme, a tener un principio, a partir de casi nada, y a expandirse aceleradamente. Lo que ha creado, a su vez, un nuevo misterio donde por un tiempo reinó la certeza absoluta.

Nuevas tendencias en comunicación especializada y en educación Enrique Vaquerizo Domínguez,Alexandra Ma

Sandulescu Budea, Magdalena López Pérez, 2022-11-01 La Universidad se encuentra en pleno progreso desde su tiempo cero; de hecho, halla su carta de naturaleza en la necesidad de mejorar el medio que la nutre y por y para el que existe: la sociedad. Rompiendo las viejas membranas de la enseñanza imperante hasta el siglo XX, las nuevas ®evoluciones de contenidos y fórmulas, como lo fuera el EEES (o Plan Bolonia) o las TIC, suponen la respuesta a esas actualizadas necesidades docentes y curriculares. Las Humanidades, las Artes, las Ciencias sociales y la Docencia se reescriben, hibridando, gracias a los nuevos lenguajes y herramientas, contenidos otrora lejanos. La nueva Academia es poliédrica, ínter y multi disciplinar, dialógica y colaborativa. En este estado de cosas la colección Herramientas universitarias se erige como atalaya para agrupar bajo su égida al más amplio conjunto de autores internacionales que iluminen, con sus investigaciones, la panoplia de contenidos que conforman el mundo científico donde nace el futuro. La calidad intelectual queda refrendada mediante la rigurosa implantación del habitual proceso garante, basado en la revisión o arbitraje por pares ciegos (peer review) de estos capítulos, sin renunciar a la más antigua tradición universitaria que obliga al opositor de lo publicado, a soportar el peso de la prueba. Este doble modelo de evaluación, a priori y a posteriori, garantiza la calidad del contenido de los textos de esta colección. Pertener a la Academia, y en ello radica orgullosamente su valía, supone que todos sus miembros responden a una ambición irrenunciable: mostrar que el conjunto de sus trabajos conforma la vanguardia científica internacional. El texto que aquí se presenta está auspiciado por el Fórum Internacional de Comunicación y Relaciones Públicas (Fórum XXI), la Sociedad Española de Estudios de la Comunicación Iberoamericana (SEECI), la Asociación cultural Historia de los Sistemas Informativos y el Grupo Complutense (no 931.791) de Investigación en Comunicación Concilium.
