The second, `list()`, is using the actual list type constructor to create a new list which has contents equal to the first list. **How to list all installed packages and their versions in Python?** Jul 8, 2018 · Is there a way in Python to list all installed packages and their versions? In order to instantiate, you need some realizations (implementations) of that interface. Try the below code with very popular implementations of List interface: `List supplierNames = new ArrayList();` or `List supplierNames = new LinkedList ...` **Spring Boot YAML configuration for a list of strings** Nov 2, 2014 · In the yaml, the list of values for the ArrayList can be a comma delimited list.
