Administración de operaciones de construcción Alfredo Serpell Bley,2024-03-06 La ejecución de las obras es la etapa más relevante de los proyectos de construcción y presenta muchas características que hacen de ella una actividad compleja. Debido a fallas en su dirección o a factores del entorno, muchas construcciones terminan atrasadas, con sobrecostos, problemas de calidad, accidentes, conflictos contractuales, etc. Dirigir una obra es un trabajo desafiante y de alto impacto, que requiere de una gran capacidad de liderazgo y comprensión de todo el proceso, así como de los diversos factores que lo afectan. Siendo los aspectos técnicos muy importantes para la edificación y sustentabilidad, también ha sido ampliamente demostrado que la administración es una palanca esencial para lograr eficiencia y efectividad en la ejecución de las operaciones en función de cumplir de manera óptima con el resultado final esperado. Este libro, en su tercera edición, aporta información muy valiosa, consejos, ideas y recomendaciones para profesionales y estudiantes interesados en el área de la administración de la construcción (construction management). De fácil lectura, recorre los principales temas de la dirección de obras, como son: características productivas; factores de desempeño, tales como productividad y trabajo; métodos para gestionar la calidad; planificación de la obra y dirección de su ejecución; gestión de los recursos productivos; hasta finalizar con la tramitación de los contratos entre las partes.

ISO 14001. De la norma a la práctica en México Alan Gerardo Jardón Medina,Lorena Elizabeth Campos Villegas,María Concepción Martínez Rodríguez,2025-04-11 Esta obra intenta dar orientación de cómo puede ser implementado un sistema de gestión ambiental ISO 14001 en la actividad portuaria, en los laboratorios de investigación, desarrollo y biotecnología, en la industria de la construcción y en la industria farmacéutica. Por ejemplo, identificar los impactos en el ambiente es primordial para poder llevar a cabo un proyecto de construcción, pues así podemos buscar la forma de afectar lo menos posible el área de construcción y su entorno. Organización de obra y control de personal Jaime Llames Viesca, Salvador López Álvarez, 2009-02 Este manual, primer módulo formativo de los seis “Manuales prácticos para la formación del encargado en obra de edificación”, es el instrumento adecuado para favorecer el aprendizaje de los profesionales de esta materia. Contiene recordatorios que facilitan la comprensión y memorización de las materias, así como cuestionarios de autoevaluación que permiten valorar el nivel de conocimiento adquirido (las soluciones se reproducen al final). Muestra cómo se organiza, distribuye y coordina el personal de obra, dónde se ubican las instalaciones provisionales y fijas y cómo se planifica el trabajo de la maquinaria, los accesos de la obra y la productividad de los tajos, adaptándose en todo momento a la normativa laboral vigente y a la economía de la obra. Su contenido formativo se ha estructurado en doce unidades de trabajo. En las primeras se analiza toda la documentación que conforma el proyecto de la obra, así como el plan de seguridad y salud y las autorizaciones necesarias para poder iniciarla. Además, se analiza cuáles son las comprobaciones que hay que realizar en el terreno durante la fase del replanteo y en la instalación de medios auxiliares; la planificación de los recursos, medios auxiliares y maquinaria y programación de tiempos y costes, y, por último, cómo se ejecutan los partes de trabajo y se realiza un repaso general a todas las fases del proceso edificativo. Los contenidos, que se orientan a favorecer el aprendizaje de los profesionales, se presentan de forma práctica para que sean accesibles y suficientemente aclaratorios por sí mismos. Al final de la unidad didáctica, apoyando el proceso de aprendizaje, se pueden realizar unos ejercicios de autoevaluación, coherentes con los objetivos iniciales marcados, cuyas soluciones se presentan al final del libro. Por último, y con la intención de incrementar la vertiente pedagógica y facilitar el estudio de los contenidos, se utilizan elementos visuales de refuerzo, como ladillos, recuerdos, esquemas e ilustraciones.

Ciudades y regiones en el contexto contemporáneo. Los autores nacionales son todos miembros de la Asociación de Estudios Regionales y Urbanos (ASCER) y sus textos recogen trabajos de investigación que han sido presentados en encuentros de esta organización académica.

Diseño de un sistema de información mediante una intranet corporativa: propuesta de implementación en una empresa constructora de la provincia de Granada Elisa Legeren, 2012 Tesis de Máster del año 2010 en el tema Medios / Comunicación - Multimedia, internet, nuevas tecnologías, Nota: 10, Universidad de Granada (Facultad de Comunicación y Documentación), Materia: Máster en Información Científica, Idioma: Español, Resumen: El presente proyecto tiene como objetivo valorar la viabilidad de la implantación de una intranet corporativa en una empresa de construcción de la provincia de Granada: Constructora de Obras El Partal. El estudio parte de un análisis de la organización desde el punto de vista tanto funcional como informacional, para dibujar un perfil de la organización y situarnos en el contexto de la empresa con la máxima cercanía posible. Como fruto de este análisis ha sido detectado un conjunto de necesidades que son críticas para la organización, se ha conocido el uso que se hace de la información desde las distintas áreas funcionales y departamentos, y se ha definido el perfil de los usuarios. En este último caso, se ha profundizado en las formas en que éstos producen, utilizan y comparten dicha información, para poder presentar así un modelo de intranet funcional a dicha cultura informacional. Todo esto se ha conseguido gracias a una auditoría de información global de la organización. El proyecto incluye una relación de beneficios que la empresa obtendrá con la implementación de la intranet, y que se centran principalmente en la mejora de la comunicación, la cohesión de los grupos, la compartición de conocimientos, etc., con el objetivo de hacer de las tareas y actividades del día a día de la empresa un proceso más eficiente. Además, contiene un plan de viabilidad económica que ayude a la dirección de la organización, sin cuyo apoyo este proyecto sería inviable, a tomar la decisión de implantar la herramienta.

Alianzas sociales en América Latina James E. Austin,2005 Este libro muestra la importancia de la creación de alianzas entre las empresas y las OSC como mecanismo innovador para aprovechar las fuerzas de ambos sectores, en pos de mejorar la sociedad. Representa el resultado inicial y tangible de dicha colaboración. Este libro no es un tratado académico dedicado a alabar las bondades de las alianzas entre las empresas y las organizaciones sin fines de lucro. Más bien es un libro incisivo, que analiza las fortalezas y debilidades, las oportunidades y amenazas que presenta el camino de la colaboración intersectorial.
