Food and Feasts in the Middle Ages Lynne Elliott, 2004 Provides an overview of food, hunting, and cooking in the Middle Ages.

Food and Eating in Medieval Europe Martha Carlin, Joel T. Rosenthal, 1998-07-01 Eating and drinking are essential to life and therefore of great interest to the historian. As well as having a real fascination in their own right, both activities are an integral part of the both social and economic history. Yet food and drink, especially in the middle ages, have received less than their proper share of attention. The essays in this volume approach their subject from a variety of angles: from the reality of starvation and the reliance on 'fast food' of those without cooking facilities, to the consumption of an English lady's household and the career of a cook in the French royal household.

Food in Medieval Times Melitta Weiss Adamson, 2004-10-30 Students and other readers will learn about the common foodstuffs available, how and what they cooked, ate, and drank, what the regional cuisines were like, how the different classes entertained and celebrated, and what restrictions they followed for health and faith reasons. Fascinating information is provided, such as on imitation food, kitchen humor, and medical ideas. Many period recipes and quotations flesh out the narrative. The book draws on a variety of period sources, including as literature, account books, cookbooks, religious texts, archaeology, and art. Food was a status symbol then, and sumptuary laws defined what a person of a certain class could eat—the ingredients and preparation of a dish and how it was eaten depended on a person's status, and most information is available on the upper crust rather than the masses. Equalizing factors might have been religious strictures and such diseases as the bubonic plague, all of which are detailed here.

Food and Feast in Medieval England P. W. Hammond, 1993 'Alle the poure peple then peescoddes brought / Benes and baken apples thei brouhte in here lappes / Onions and pot herbs and ripe chiries many'. Food in the Middle Ages was not always as plentiful as this passage from William Langland's *Piers Plowman* might suggest, but there is no doubting its variety. This unique and fully illustrated study begins by examining this extraordinary range, discussing its production and distribution and identifying the different types of food eaten by all classes of medieval English society. Everything that can be discovered about medieval food is dealt with here, from hunting, fish-breeding, brewing and baking to food hygiene and storage and the way in which the kitchen and pantry of a large household were organized. For the first time, too, the nutritional value of the food is systematically evaluated in order to consider whether or not people in medieval England were well fed. There is also a detailed description of the remarkably elaborate regulations known to have been associated with the serving and eating of food in the great households. The book concludes with a discussion of the organization of medieval feasts, such as that held at York on 26 December 1251, which, after six months of preparation, saw the consumption of no fewer than 68,500 loaves of bread and 25,000 gallons of wine, along with 1,300 deer, 170 boars, 60,000 herring, 10,000 haddock and 7,000 hens. Firmly based on archaeological and written evidence, this groundbreaking work provides a fascinating introduction to a vital but often neglected topic in the study of medieval England, and one which will be of interest to historian and layman alike.

Fast and Feast Bridget Ann Henisch, 1976 *Kochen / Geschichte (Mittelalter)*.

Food and Eating in Medieval Europe Martha Carlin, Joel Thomas Rosenthal, 1998 The essays in this volume approach their subject from a variety of angles: from the reality of starvation and the reliance on fast food of those without cooking facilities,

to the consumption of an English lady's household and the career of a cook in the French royal household.

Holy Feast and Holy Fast Caroline Walker Bynum, 1988-01-07 In the period between 1200 and 1500 in western Europe, a number of religious women gained widespread veneration and even canonization as saints for their extraordinary devotion to the Christian eucharist, supernatural multiplications of food and drink, and miracles of bodily manipulation, including stigmata and inedia (living without eating). The occurrence of such phenomena sheds much light on the nature of medieval society and medieval religion. It also forms a chapter in the history of women. Previous scholars have occasionally noted the various phenomena in isolation from each other and have sometimes applied modern medical or psychological theories to them. Using materials based on saints' lives and the religious and mystical writings of medieval women and men, Caroline Walker Bynum uncovers the pattern lying behind these aspects of women's religiosity and behind the fascination men and women felt for such miracles and devotional practices. She argues that food lies at the heart of much of women's piety. Women renounced ordinary food through fasting in order to prepare for receiving extraordinary food in the eucharist. They also offered themselves as food in miracles of feeding and bodily manipulation. Providing both functionalist and phenomenological explanations, Bynum explores the ways in which food practices enabled women to exert control within the family and to define their religious vocations. She also describes what women meant by seeing their own bodies and God's body as food and what men meant when they too associated women with food and flesh. The author's interpretation of women's piety offers a new view of the nature of medieval asceticism and, drawing upon both anthropology and feminist theory, she illuminates the distinctive features of women's use of symbols. Rejecting presentist interpretations of women as exploited or masochistic, she shows the power and creativity of women's writing and women's lives.

Homosexuality in Medieval Europe Tobias Lanslor, Although the church condemned homosexuality in the late Middle Ages, they had not been too worried about homosexual behavior, and such an attitude also prevailed in the secular world. However, around the thirteenth century, these tolerant attitudes changed dramatically. Some historians relate this change to the climate of fear and intolerance that prevailed in the century against minority groups that departed from the norm of the majority. This persecution reached its peak in the medieval Inquisition, when the Cathars and Waldenses sects were accused of obscenity, sodomy and Satanism. In 1307, accusations of sodomy and homosexuality were important during the Knights Templar trial.

Foods, Feasts, and Celebrations Margaux Baum, Tehmina Bhote, 2016-12-15 Many entries in the historical record and examples from popular culture show nobles, knights, kings, and peasants alike celebrating with food and drink. In this book, medieval agriculture, food preparation, and eating are explored in equal measure. With vivid examples from historical manuscripts, paintings, frescoes, and more, this book opens a window for readers into the culinary worlds and celebratory rituals of the people of the Middle Ages. From typical foods of the common people, to the most dazzling and lavish displays of

consumption by kings and queens, this volume is sure to sate readers' appetites for knowledge about the era.

A Cultural History of Food in the Medieval Age Massimo Montanari, 2014-05-22 Europe was formed in the Middle Ages. The merging of the traditions of Roman-Mediterranean societies with the customs of Northern Europe created new political, economic, social and religious structures and practices. Between 500 and 1300 CE, food in all its manifestations, from agriculture to symbol, became ever more complex and integral to Europe's culture and economy. The period saw the growth of culinary literature, the introduction of new spices and cuisines as a result of trade and war, the impact of the Black Death on food resources, the widening gap between what was eaten by the rich and what by the poor, as well as the influence of religion on food rituals. *A Cultural History of Food in the Medieval Age* presents an overview of the period with essays on food production, food systems, food security, safety and crises, food and politics, eating out, professional cooking, kitchens and service work, family and domesticity, body and soul, representations of food, and developments in food production and consumption globally.

Authorship, Worldview, and Identity in Medieval Europe Christian Raffensperger, 2022-03-03 What did medieval authors know about their world? Were they parochial and focused on just their monastery, town, or kingdom? Or were they aware of the broader medieval Europe that modern historians write about? This collection brings the focus back to medieval authors to see how they described their world. While we see that each author certainly had their own biases, the vast majority of them did not view the world as constrained to their small piece of it. Instead, they talked about the wider world, and often they had informants or textual sources that informed them about the world, even if they did not visit it themselves. This volume shows that they also used similar ideas to create space and identity - whether talking about the desert, the holy land, or food practices in their texts. By examining medieval authors and their own perceptions of their world, this collection offers a framework for discussions of medieval Europe in the twenty-first century.

Misconceptions About the Middle Ages Stephen Harris, Bryon L. Grigsby, 2010-05-26 Brought together by an impressive, international array of contributors this book presents a representative study of some of the many misinterpretations that have evolved concerning the medieval period.

Women and Gender in Medieval Europe Margaret Schaus, 2006 Publisher description

Daily Life in Medieval Europe Jeffrey L. Forgeng, 1999-08-30 Explore the Middle Ages, a complex and often misunderstood period in European history, through this vivid examination. Details of everyday living recreate the time period for modern readers, conveying the foreignness of the medieval world while bringing it into focus. The volume provides a two-pronged approach to history beginning with a broad sketch of the general dynamics that shaped the medieval experience while at the same time creating a detailed and clear portrait of what life would have been like for real individuals living in specific settings at the time. The reader is introduced to medieval society in the first three chapters, which include

information on the life cycle, material culture, and the economy. These chapters provide an understanding of what people ate, what their social lives were like, what they wore, what kinds of jobs they had, and much more. Following are portraits of life in four specific medieval settings, offering in each case a particular example of the type: the village (Cuxham in Oxfordshire), the castle (Dover), the monastery (Cluny) and the town (Paris). Extensive use of documentary sources from each place sketch the broad contours of the social setting and provide details of the everyday experiences of real individuals. The volume concludes with an exploration of how ordinary people perceived the world in which they lived. Original games, recipes, and music are also provided to round out this rich introduction to life in medieval Europe.
