Environmental Unions Craig Slatin, 2017-03-02 During the 1970s and 1980s, a hazardous waste management industry emerged in the U.S., driven by government and polluting industry responses to a hazardous waste crisis. In 1979, labor unions began to seek federal health and safety protections for workers in that industry and for firefighters responding to hazardous materials fires. Those efforts led to a worker health and safety section in the Superfund Amendments and Reauthorization Act of 1986. The legislation mandated regulation of hazardous waste operations and emergency response worker protection, and establishment of a national health and safety training grant program - which became the Worker Education and Training Program (WETP). Craig Slatin provides a history of labor's success on the coattails of the environmental movement and in the middle of a rightward shift in American politics. He explores how the WETP established a national worker training effort across industrial sectors, with case studies on the health and safety training programs of two unions in the WETP - the Oil, Chemical, and Atomic Workers and the Laborers' Union. Lessons can be learned from one of the last major worker health and safety/environmental protection victories of the 1960s-1980s reform era, coming at the end of the golden age of regulation and just before the new era of deregulation and market dominance. Slatin's analysis calls for a critical survey of the social and political tasks facing those concerned about worker and community health and environmental protection in order to make a transition toward just and sustainable production.

Impact of Hazardous Waste on Human Health Barry L. Johnson,2020-09-10 The author of Impact of Hazardous Waste on Human Health is a public health official with the unique perspective that only insider status can provide. His book is intended for policy makers, environmentalists, toxicologists, public health officials, academic personnel, and health care providers. The author addresses six themes: hazardous waste issues must be more vigorously examined, site remediation is critical, risk management must extend beyond waste site clean up, disease prevention must be a priority, interagency partnership is mandatory, and the best technology must be applied. Johnson also considers the pros and cons of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) also known as the Superfund. His years of experience with this law, and countless other issues related to hazardous waste, make Impact of Hazardous Waste on Human Health an important and positive contribution.
