**Introductory Readings in Anthropology** Hilary Callan, Brian Street, Simon Underdown, 2013-05 Anthropology seeks to understand the roots of our common humanity, the diversity of cultures and world-views, and the organisation of social relations and practices. As a method of inquiry it embraces an enormous range of topics, and as a discipline it covers a multitude of fields and themes, as shown in this selection of original writings. As an accessible entry point, for upper-level students and first year undergraduates new to the study of anthropology, this reader also offers guidance for teachers in exploring the subject's riches with their students. That anthropology is an immensely expansive inquiry of study is demonstrated by the diversity of its topics – from nature conservation campaigns to witchcraft beliefs, from human evolution to fashion and style, and from the repatriation of indigenous human remains to research on literacy. There is no single 'story of anthropology'. Taken together, these fundamental readings are evidence of a contemporary, vibrant subject that has much to tell us about all the worlds in which we live.

**The Intersection of Trauma and Disaster Behavioral Health** Katie E. Cherry, Allison Gibson, 2020-11-19 This contributed volume examines the intersection of trauma and disaster behavioral health from a lifespan perspective, filling a critical gap in the literature on disaster mental health research. In the chapters, the contributors evaluate behavioral data of adults exposed to various environmental events in both the United States (i.e., the 2017 Hurricanes Irma in Florida and Harvey in Houston) and abroad (i.e., missile fire in the 2014 Israel-Gaza conflict). Contributors also suggest future directions, practices, and policies for trauma and disaster response. The three parts of the book provide an overview of disaster

behavioral health across the lifespan, propose practical applications of research theories to psychosocial problems resulting from disasters and trauma, and evaluate disaster and trauma interventions from a macro-level perspective. Topics explored among the chapters include: Integrating Trauma-Informed Principles into Disaster Behavioral Health Targeting Older Adults Cultural Competence and Disaster Mental Health When Disasters Strike: Navigating the Challenges of “Sudden Science” Frameworks of Recovery: Health Caught at the Intersection of Housing, Education, and Employment Opportunities After Hurricane Katrina Substance Use Issues and Behavioral Health After a Disaster Psychosocial Recovery After Natural Disaster: International Advocacy, Policy, and Recommendations The Intersection of Trauma and Disaster Behavioral Health is a vital resource for researchers whose expertise covers the domains of trauma, health and wellness, and natural and technological disasters. The book also is a useful supplement to graduate courses in psychology, sociology, social work, disaster science, human ecology, and public health.

*Your Destiny is in your Hands* Alina A. Rubi, 2023-07-02 Everything is in the palms of your hands, in them hides your past, present and future. The ancient art of interpreting the symbols of the hands is known as Palmistry, and has been present in our civilization since ancient times. Palmistry has been essential in several cultures, and has defined the destiny of many. The hands have symbolized strength and power and are a miniature representation of human destiny. All the lines in the palms of the hands have meanings, truths about the past, present and future. The shape and markings of a hand reveal a person's character and tendencies. Fingerprints are unique and are a method of personal identification. The signs and lines engraved on the hand are unique, you will never find two lines of life, nor two identical Mountains. Our hands are different from those of our fellow human beings and this means that our destiny is carved into the palms of our hands, and will always be different

from that of any other human being.
