México antiguo Lewis H. Morgan,Adolph F. Bandelier,2003 Las tesis de Morgan y Bandelier pertenecen al siglo XIX, cuando la antropología y la arqueología no existían como ciencias: a pesar de esto, sus estudios contribuyen al análisis de la sociedad azteca y nos conducen a verla con una VISIÓN CRÍTICA: pero, sobre todo, a comprender lo que fue en su esencia el México antiguo.

Anthropological Perspectives on Rural Mexico Cynthia Hewitt de Alcántara,2017-07-06 In this title, first published in 1984, the author examines the social and political forces surrounding the practice of anthropology at different periods in the history of Mexico since 1917. She does this by analysing and tracing the development of competing anthropological perspectives, from ethnographic particularism and functionalism through indigenismo, cultural ecology, Marxism and the dependency paradigm, to the historical structuralism of the 1970s. This book provides the basis for a systematic analysis of peasant studies in Mexico, and discusses in stimulating terms the theoretical and empirical difficulties of the profession of anthropology itself.

The Routledge Handbook of Mesoamerican Bioarchaeology Vera Tiesler,2022-05-23 This volume brings together a range of contributors with different and hybrid academic backgrounds to explore, through bioarchaeology, the past human experience in the territories that span Mesoamerica. This handbook provides systematic bioarchaeological coverage of skeletal research in the ancient Mesoamericas. It offers an integrated collection of engrained, bioculturally embedded

explorations of relevant and timely topics, such as population shifts, lifestyles, body concepts, beauty, gender, health, foodways, social inequality, and violence. The additional treatment of new methodologies, local cultural settings, and theoretic frames rounds out the scope of this handbook. The selection of 36 chapter contributions invites readers to engage with the human condition in ancient and not-so-ancient Mesoamerica and beyond. The Routledge Handbook of Mesoamerican Bioarchaeology is addressed to an audience of Mesoamericanists, students, and researchers in bioarchaeology and related fields. It serves as a comprehensive reference for courses on Mesoamerica, bioarchaeology, and Native American studies.

Traditional Mexican Agriculture Alba González Jácome, 2022-04-19 This long-needed book highlights how traditional Mexican agriculture has changed according to environmental, climatic, geographical, social and cultural conditions. Grounded in archaeological-historical data from interrelated research of various scientific disciplines, the book also draws on studies made by anthropologists of varied small-scale agricultural groups. Traditional Mexican Agriculture is the result of a holistic study of Mexican agriculture. It offers the reader a perspective of traditional agriculture in Mexico from social, cultural and ecological Anthropology, Ethnology, regional and environmental History, and Agroecology, to help obtain sustainable agroecology where human societies obtain better ways of life and a healthy and nutritious food system. The book further aims to recover ideas, management, and components of local knowledge of small-scale farmers. Pitched at university students and academics, as well as researchers and developers of agricultural matters, this book will be ideal reading at agrarian universities and related institutions. It provides a basis for future studies in sustainable agricultural systems in this region.

Forsaken Harvest Luis G. Cueva, 2020-11-05 This historical monograph examines the decline of the hacienda estates within Jalisco, Mexico, during the early decades of the twentieth century. The book also explores the impact of the land reform program of President Lázaro Cárdenas in transforming the agrarian economic structure of the region. This study contributes to an ongoing lively debate about the hacienda system and the meaning of Cárdenas's reforms. This is an important work because it explores the evolution of a regional socioeconomic system that promoted urban industrial growth at the expense of the rural poor. The model of regional development described is applicable to other areas of Mexico and underdeveloped Third World nations with extensive peasant populations. The research for this investigation has wider implications regarding issues of global hunger and malnutrition.

México Profundo Guillermo Bonfil Batalla, 2010-06-28 This translation of a major work in Mexican anthropology argues that Mesoamerican civilization is an ongoing and undeniable force in contemporary Mexican life. For Guillermo Bonfil Batalla, the remaining Indian communities, the de-Indianized rural mestizo communities, and vast sectors of the poor urban population constitute the México profundo. Their lives and ways of understanding the world continue to be rooted in Mesoamerican civilization. An ancient agricultural complex provides their food supply, and work is understood as a way of

maintaining a harmonious relationship with the natural world. Health is related to human conduct, and community service is often part of each individual's life obligation. Time is circular, and humans fulfill their own cycle in relation to other cycles of the universe. Since the Conquest, Bonfil argues, the peoples of the México profundo have been dominated by an imaginary México imposed by the West. It is imaginary not because it does not exist, but because it denies the cultural reality lived daily by most Mexicans. Within the México profundo there exists an enormous body of accumulated knowledge, as well as successful patterns for living together and adapting to the natural world. To face the future successfully, argues Bonfil, Mexico must build on these strengths of Mesoamerican civilization, one of the few original civilizations that humanity has created throughout all its history.

Handbook to Life in the Aztec World Manuel Aguilar-Moreno, 2007 Describes daily life in the Aztec world, including coverage of geography, foods, trades, arts, games, wars, political systems, class structure, religious practices, trading networks, writings, architecture and science.

Mexico's Indigenous Past Alfredo Lopez Austin, Leonardo Lopez Lujan, 2005-09-01 This handsomely illustrated book offers a panoramic view of ancient Mexico, beginning more than thirty thousand years ago and ending with European occupation in the sixteenth century. Drawing on archaeological and ethnohistorical sources, the book is one of the first to offer a unified vision of Mexico's precolonial past. Typical histories of Mexico focus on the prosperity and accomplishments of Mesoamerica, located in the southern half of Mexico, due to the wealth of records about the glorious past of this region. Mesoamerica was only one of three cultural superareas of ancient Mexico, however, all interlinked by complex economic and social relationships. Tracing the large social transformations that took place from the earliest hunter-gatherer times to the Postclassic states, the authors describe the ties between the three superareas of ancient Mexico, which stretched from present-day Costa Rica to what is now the southwestern United States. According to the authors, these superareas-Mesoamerica, Aridamerica, and Oasisamerica-cannot be viewed as independent entities. Instead, they must be considered as a whole to understand the complex reality of Mexico's past and possible visions of Mexico's future.

Religion and Empire Geoffrey W. Conrad, Arthur A. Demarest, 1984-08-31 A provocative, comparative study of the formation and expansion of the Aztec and Inca empires. Argues that prehistoric cultural development is largely determined by continual changes in traditional religion.

Building the Borderlands Casey Walsh, 2008-02-19 Cotton, crucial to the economy of the American South, has also played

a vital role in the making of the Mexican north. The Lower Río Bravo (Rio Grande) Valley irrigation zone on the border with Texas in northern Tamaulipas, Mexico, was the centerpiece of the Cárdenas government's effort to make cotton the basis of the national economy. This irrigation district, built and settled by Mexican Americans repatriated from Texas, was a central feature of Mexico's effort to control and use the waters of the international river for irrigated agriculture. Drawing on previously unexplored archival sources, Casey Walsh discusses the relations among various groups comprising the "social field" of cotton production in the borderlands. By describing the complex relationships among these groups, Walsh contributes to a clearer understanding of capitalism and the state, of transnational economic forces, of agricultural and water issues in the U.S.-Mexican borderlands, and of the environmental impacts of economic development. Building the Borderlands crosses a number of disciplinary, thematic, and regional frontiers, integrating perspectives and literature from the United States and Mexico, from anthropology and history, and from political, economic, and cultural studies. Walsh's important transnational study will enjoy a wide audience among scholars of Latin American and Western U.S. history, the borderlands, and environmental and agricultural history, as well as anthropologists and others interested in the environment and water rights.
