**Saving the World's Deciduous Forests** Robert A. Askins, Robert Askins, 2014-03-25 Deciduous forests have been remarkably resilient throughout their history, recovering from major shifts in climate and surviving periods of massive deforestation. But today the world's great forests confront more ominous threats than ever before. This visionary book is the first to examine forests consisting of oaks, maples, hickories, beeches, chestnuts, birches and ecologically similar animals and plants on three continents—East Asia, Europe, and North America—to reveal their common origin back in time, the ecological patterns they share, and the approaches to conservation that have been attempted on their behalf. Although these forests face common problems, threats due to human activities vary. Different land use and agricultural practices on the three continents, as well as different attitudes about what is worth preserving, have led to strikingly different approaches to forest conservation. Robert Askins explores the strengths and weaknesses of conservation efforts across the continents and concludes that the ideal strategy for the future will blend the best ideas from each.

In Other Words Barbara Williams, 1998 Sixteen of Australia's foremost poets are featured in this volume. They talk candidly about their lives and work: of the craft, the rigour, the pangs and pleasures of their calling; of winged moments caught, however fleetingly, on the page. These writers also speak of transformation and transcendence, the creative process, their individual modes and methods of writing and the act of writing itself. The interviews provide valuable insights on such topics as: gender and writing; landscape; the function of poetry and the poet's social role; influences embraced and withstood - literary, personal, local, regional, national, international. The writers and their poetry are discussed from both within and beyond Australian borders. This collection offers a broad range of Australian poets, most of whom are now in the middle to later years of their career. These poets have contributed significantly to the life and quality of poetry in Australia over recent decades, and continue to play pivotal roles in Australia's cultural domain today, as the country moves towards the threshold of a new century.

**The daily life of the soul master in Douluo** Cole Moore,2003-01-19 I slowly opened my eyes and looked at the scenery around me. What I saw was exactly the same as before I went into seclusion thirty years ago. Haha, I didn't expect that thirty years would have passed since I went into seclusion. Come to think of it, these thirty years were just a blink of an eye. Twenty-five years ago, I had already stepped halfway into the immortal world, but at the moment when I was about to ascend to immortality, my mind suddenly became unstable, and I had to withdraw my foot that was about to ascend to immortality. I don't know why, but I just felt that if I took that step, I would step into a situation from which there would be no return. So I had to retreat

*Wetlands of Tropical and Subtropical Asia and Africa* Thammineni Pullaiah,2025-03-13 A comprehensive survey of exemplary wetlands that highlights their importance for local livelihoods as well as for global biodiversity Covering 17 different regions, Wetlands of Tropical and Subtropical Asia and Africa provides detailed information on some of the world's most important wetlands and wetland types across those countries, as well as their current and potential biological

resources. Each wetland is analyzed by a regional expert. Written with UN sustainable development goals in mind, *Wetlands of Tropical and Subtropical Asia and Africa* includes information on: Recommendations for the sustainable management of wetlands in the Asian and African tropics The importance of sustaining local economic livelihoods in each wetland region by providing food resources as well as recreational opportunities Wetland ecosystem services including carbon sequestration, water filtration, nutrient retention, and flood mitigation Threats to the integrity of each wetland region as well as management strategies and practical conservation and restoration measures *Wetlands of Tropical and Subtropical Asia and Africa* is an essential reference on the subject for ecologists, conservation scientists, hydrologists, and environmental and water resource managers. **Fire in Ecosystems of Boreal Eurasia** Johann Georg Goldammer,Valentin Furyaev,2013-03-09 One of the first priority areas among joint East/West research programs is the rational use of natural resources and sustainable development of regions. In the boreal zone of North America and Eurasia forests are economically very important and, at the same time highly vulnerable to disturbances. Because of its size and ecological functions the boreal forest zone and its most dynamic disturbance factor - fire - play an important role in ecosystem processes on global scale. Interest within the global change research community in Northern Eurasia (Fennoscandia, European Russia, Siberia, and the Far East of Russia) has grown dramatically in the last few years. It is a vast area about which very little is known. It is a region where temperature rise due to anthropogenic climate forcing is predicted to be the greatest, and where the consequent feedbacks to the atmosphere are potentially large. In addition, it is poised to undergo rapid economic development, which may lead to large and significant changes to its land cover. Much of this interest in Northern Eurasia, as in the high latitude regions in general, is centered on its role in the global carbon cycle, which is likely to be significantly affected under global change. New research initiatives between Western and Eastern countries have been designed to address a series of phenomena, problems and management solutions.
