Science and Colonial Expansion Lucile H. Brockway, 2002-01-01 This widely acclaimed book analyzes the political effects of scientific research as exemplified by one field, economic botany, during one epoch, the nineteenth century, when Great Britain was the world's most powerful nation. Lucile Brockway examines how the British botanic garden network developed and transferred economically important plants to different parts of the world to promote the prosperity of the Empire. In this classic work, available once again after many years out of print, Brockway examines in detail three cases in which British scientists transferred important crop plants--cinchona (a source of quinine), rubber and sisal--to new continents. Weaving together botanical, historical, economic, political, and ethnographic findings, the author illuminates the remarkable social role of botany and the entwined relation between science and politics in an imperial era.

**How They Lived** James Ciment, 2015-12-14 Ideal for history majors, nonhistory majors taking history courses, as well as general readers, this book provides not only the primary documents and artifacts of ordinary people in history, but also annotations that help the reader put them into context and grasp their deeper meaning. This two-volume work explores daily life across human history through primary sources, making use of this primary source material as well as detailed analysis to help readers understand and use these sources as evidence of how life used to be. The diverse selection of sources includes artifacts, inscriptions, histories, letters, and first-hand accounts, ranging from ancient times to the emergence of modern Europe to the present day. This set makes use of an innovative layout: facing pages contain a primary source selection on the left side, with the introduction and analysis on the right side. This facing-pages layout allows readers to access the text information and the primary source itself without any distracting page-turning. Unlike most other books on history that relay key, momentous events in history and tales regarding kings and generals, aristocrats, and the highly educated, *How They Lived: An Annotated Tour of Daily Life through History in Primary Sources* includes significant coverage of ordinary people and interesting information about everyday life at all levels of society. As a result, this collection helps close the gap in what students of history are typically exposed to through its presentation of both written documents and images of artifacts.

Global Matters Paul Jay, 2014-02-15 As the pace of cultural globalization accelerates, the discipline of literary studies is

undergoing dramatic transformation. Scholars and critics focus increasingly on theorizing difference and complicating the geographical framework defining their approaches. At the same time, Anglophone literature is being created by a remarkably transnational, multicultural group of writers exploring many of the same concerns, including the intersecting effects of colonialism, decolonization, migration, and globalization. Paul Jay surveys these developments, highlighting key debates within literary and cultural studies about the impact of globalization over the past two decades. *Global Matters* provides a concise, informative overview of theoretical, critical, and curricular issues driving the transnational turn in literary studies and how these issues have come to dominate contemporary global fiction as well. Through close, imaginative readings Jay analyzes the intersecting histories of colonialism, decolonization, and globalization engaged by an array of texts from Africa, Europe, South Asia, and the Americas, including Zadie Smith's *White Teeth*, Junot Díaz's *The Brief Wondrous Life of Oscar Wao*, Kiran Desai's *The Inheritance of Loss*, Arundhati Roy's *The God of Small Things*, Vikram Chandra's *Red Earth and Pouring Rain*, Mohsin Hamid's *Moth Smoke*, and Zakes Mda's *The Heart of Redness*. A timely intervention in the most exciting debates within literary studies, *Global Matters* is a comprehensive guide to the transnational nature of Anglophone literature today and its relationship to the globalization of Western culture.

*Aesthetic Teaching Pedagogies* Reynaldo B. Inocian, 2018-10-09 This book presents an assortment of teaching and assessment strategies appropriate for 21st century learners, based on the author's 25 years of teaching experience in private and state school institutions in the Philippines. It highlights the outcomes-based assessment of learning; the curriculum basics for arts-based teaching; learning activities based on the integrated arts for an effective instructional process; and examples in the teaching of critical thinking, communication, collaboration, and creativity, known as the Four Cs. While the monograph focuses on the author's local context, a plethora of citations provides clear connections that address learner diversity in recent global education contexts. The text is a useful guide for students who want to pursue a degree in teaching, as well as novice and expert teachers, university professors, and advocates for teaching and learning.

*The Indian Rebellion, 1857-1859* Kaushik Roy, 2024-12-30 *The Indian Rebellion 1857-1859: A Military History in the Global Context* focuses on the military dimension of this conflict, in which Indian rebels waged both conventional and unconventional warfare against the British. In the summer of 1857, British rule almost disintegrated in north India due to the rebellion of the Indians in the Bengal Army. The military mutiny was followed by large-scale peasant uprising. But by mid-1859, the Indian Rebellion collapsed with the military defeat of the rebels. This book is the first one based on archival sources, both from India and the United Kingdom, dealing with the military history of the mid-nineteenth century Indian Rebellion. The volume wrestles with the questions of why and how the British won, ipso facto, and why and how the rebels lost. The book also situates the military experience of the mid-nineteenth century Indian subcontinent within a global context.

Besides traditional themes like strategy, tactics, technology, command, and logistics, the topics introduced by 'new' military history, such as experiences of war, impact on society and the construction of identities, are addressed throughout. The Indian Rebellion, 1857-1859 is essential for students and researchers of military history, modern Indian history, and British Imperial history.

**Religion and the Environment** R. Tanner,C. Mitchell,2016-06-03 This book is an analysis of the whole frontier between religion and the environment. It deals in turn with their interactions and the effects of each on the other in the major world religions. It considers the religious impact on human uses of time, space, materials, transport, and foods, and the environmental effects of religious influence on major topics such as population pressures, morbidity, mortality, marital arrangements, contraception, the treatment of animals, and environmental management.

*The Land of the Veda* William Butler,1906 The writer trusts that these pages may encourage and strengthen the faith of God's elect in that almighty Power which, even in the idolatrous and conservative East, is so manifestly subduing all things unto Himself. Here may be discerned the dawn of that day, so long foretold, when all Oriental races shall be blessed in a Redeemer who was himself Asiatic by birth and blood and the sphere of His personal ministry -- whose cross was erected on that continent, and whose first ministers and members were taken from among that people. The writer has not concealed his conviction that human history, and the movements and changes of thrones, and powers, and kingdoms, can be fully understood only in the light of the doctrine of the Second Psalm. Jesus Christ, the divine and eternal Son of God, who created and redeemed this world, is its Master and Lord.--Preface.
