Man: The Grand Symbol of the Mysteries: Essays in Occult Anatomy Manly Hall, 2014-06-12 2009 reprint of 1932 First edition. Manly Palmer Hall (1901-1990) was a Canadian-born author and mystic. He is perhaps most famous for his work *The Secret Teachings of All Ages: An Encyclopedic Outline of Masonic, Hermetic, Qabbalistic and Rosicrucian Symbolical Philosophy*, published in 1928 when he was 27 years old. In 1934, Hall founded the Philosophical Research Society (PRS) in Los Angeles, California, dedicating it to an idealistic approach to the solution of human problems. The PRS claims to be non-sectarian and entirely free from educational, political, or ecclesiastical control, and the Society's programs stress the need for the integration of philosophy, religion, and science into one system of instruction. The PRS Library, a public facility devoted to source materials in obscure fields, has many rare and scarce items now impossible to obtain elsewhere. In his over 70-year career, Hall delivered approximately 8,000 lectures in the United States and abroad, authored over 150 books and essays, and wrote countless magazine articles.

The Science of Planetary Signatures in Medicine Jennifer T. Gehl, 2017-01-27 A comprehensive guide to the cosmic influences that underlie health and how to apply them for profound health and healing • Examines how ancient and modern traditions of healing interconnect through the doctrine of signatures, “As above, so below” • Reveals how one’s astrological chart has implications for personal health and healing • Explains how each sign of the zodiac corresponds not only to parts of the body and its chakras but also to specific plants, herbs, colors, and emotions • Explores how to use sound healing to harmonize astrological imbalances When we look at the vast and intricate cosmos--galaxies, planets, organisms, organs, cells, molecules, atoms--there is a fundamental order, a music or harmony of the spheres. Our cells reflect the images of galaxies seen through our telescopes. We are the microcosm, reflecting the macrocosm of the heavens. Our ancestors understood these patterns and connections between humanity and the universe and developed spiritual and healing traditions in line with these cosmic truths. Yet in the 19th century, knowledge of these connections was set aside as medical science sought to create the “one size fits all” approaches to healing that dominate modern medicine today. In this comprehensive exploration of the celestial influences that underlie health and healing, Jennifer Gehl, with Marc Micozzi, examines how ancient and modern traditions of healing interconnect through the doctrine of signatures, “As above, so below”. She reveals how one’s celestial nature--the arrangement of the cosmos at the moment of birth--has implications for personal health and how each sign of the zodiac corresponds to parts of the body, the chakras, and specific plants, herbs, colors, and emotions. She explains how sound re-arranges forms according to the principles of harmony, leveraging not only the human self-regulating capacity to restore health but also that of the Earth to restore balance and harmony. Also explored are the recurrence of geometric forms in nature and how to apply this knowledge in sound healing and medical astrology. Weaving together the threads of ancient science and spirit that formed the original tapestry of medicine, Gehl explains how to restore the cosmic foundations of healing for personal, planetary, and universal health and wellbeing.

tools to achieve future growth. Presented in three volumes, plus volume IV contains references, resources & further reading, they reveal the unity of the Eastern and Western branches of our perineal wisdom. Evidence from a wide range of sources— scientific, medical, philosophical, religious, and cultural— is put forward to argue the case that humans are spiritual beings, primarily, and not merely complicated biological machines. Bilimoria teaches that consciousness is not the product of matter but the primary & 'element' from which all else emanates. This process and its underlying mechanisms are described in detail with much clarity. This work has over 2000 references and is supported by copious tables and diagrams, plus individual chapter summaries and sidenotes to assist readers in navigating the multidimensional terrain traversed. Key areas - The scientific and esoteric worldviews compared and contrasted - The ultimate promise of science - The & 'soft' and & 'hard' problems of consciousness: How external input to the physical senses results in an internal, subjective experience - Quantum physics: its contribution to a new scientific paradigm - The Mystery Teachings of All Ages: their worldwide unity and central message - & 'Wet computers' and computers: Is the brain no different, in principle, from a computer? - Death and after: the transition and continuity of consciousness in other realms - Paranormal phenomena and apparitions - Subtle bodies - Evolution and destiny - Powers latent in human beings - Divinity and the united message of all world religions - The question of immortality - The primacy of consciousness and the manner of its unfoldment from the unmanifest realms to the physical world
