Through engaging case stories, *Deep Knowledge* challenges some commonly held assumptions about learning to teach and tackles problems inherent in many teacher education programs. This book digs deep into the details of teacher learning in a way seldom attempted in teacher education textbooks.

*From Mandate to Achievement* Elaine Makas, 2009-09-14 This engaging book will guide your journey through the morass of curriculum alignment, development, and assessment. Our school struggled through missteps in curriculum alignment and implementing common assessments without the benefit of Makas' wisdom and experience. I highly recommend this book for teachers, administrators, and interested parents. —Robert A. Martin, Leadership Consultant Oakland Schools, Waterford, MI Raise schoolwide performance with a systematic, teacher-driven approach to curriculum development! Purposeful curriculum design is essential to attaining consistent academic improvement. Educators often find, however, that a viable curriculum based on mandated standards can be exceedingly challenging to create, implement, and sustain. In this book, curriculum consultant Elaine Makas provides a step-by-step guide to establishing the processes and documents necessary to build a stable, cohesive curriculum system that aligns to educational benchmarks. Based on the DAILY model (Data, Alignment, Instructional Pace Guides, Local Common Assessment, and Yearly Review), this system deconstructs the curriculum process into sequential steps that facilitate the development of instructional priorities, reveal students in need of intervention, and help ensure continuous process improvement. With numerous templates, samples, and reflective exercises, this book clearly demonstrates how to: Collect and analyze data, identify expectations, and recognize learning gaps Develop curriculum maps that align with standards and grade-level subject goals Pace instruction throughout the year according to specific objectives Create assessments that predict standardized test performance Conduct yearly improvement reviews and documentation revisions An essential resource for all schools or districts, whether struggling or successful, *From Mandate to Achievement*

enables K-12 principals, district administrators, curriculum facilitators, and teacher teams to establish a consistent and accurate curriculum process that increases academic achievement and drives continuous school improvement.

*Minding the Achievement Gap One Classroom at a Time* Jane E. Pollock, Sharon M. Ford, Margaret M. Black, 2012-05-11 The achievement gap is a persistent and perplexing challenge for educators. While school- and system-level reforms continue to be discussed in statehouses and district offices, individual teachers are challenged to do something now to help students who are falling short of standards, including students who are English language learners and receiving special education services. A companion to the ASCD best-seller *Improving Student Learning One Teacher at a Time*, this book identifies small, specific adjustments to planning, teaching, and assessment practices that will support more effective learning in every student, every day, and help close the achievement gap on a classroom-by-classroom basis. Here, you'll learn how to \* Use readily available tools--curriculum documents, a plan book, and a grade book--to improve all students' access to, interaction with, and mastery of lesson content. \* Design daily lessons that clarify learning goals and require students to use high-yield learning strategies, seek feedback, and reflect on their progress. \* Promote the progress of English language learners through coordinated pursuit of content and language goals, and synchronize instruction to improve the performance of special education students in both co-teaching and resource environments. This book also features the voices of working educators who share how minding the gap has helped them engage academically at-risk students, ELLs, and special education students; improve students' test scores; and sustain these gains over time. If you are a classroom teacher or specialist committed to helping all your students become more successful learners and unwilling to wait for high-level

solutions or even the results of another data retreat, then this is just the resource you need.
