Gearhead at Large Steven Rossi, West Peterson, 2021-08-10 A popular feature in *Antique Automobile* magazine, Steven Rossi's columns open up the world of old cars, transporting readers to earlier times from the age of horseless carriages through the evolution of cars and car culture. This compilation from a decade's writings draws on a lifetime of knowledge and experience amassed in the antique auto hobby, the enthusiast community and the automotive industry to explore topics large and small. The selected essays, edited and with photographs provided by award-winning *Antique Automobile* editor West Peterson, include informative treatments of historical subjects and technical matters, whimsical observations, important brand and model analyses, profiles of compelling personalities and an abundance of fascinating excursions down side roads of the automotive map. For the curious, think of this collection as a crash course in automotive history. For those already immersed in the old car universe, it offers fresh insights and an authoritative perspective on topics of lasting interest.

Why Do We Quote? Ruth Finnegan, 2011-03-01 Quoting is all around us. But do we really know what it means? How do people actually quote today, and how did our present systems come about? This book brings together a down-to-earth account of contemporary quoting with an examination of the comparative and historical background that lies behind it and the characteristic way that quoting links past and present, the far and the near. Drawing from anthropology, cultural history, folklore, cultural studies, sociolinguistics, literary studies and the ethnography of speaking, Ruth Finnegan's fascinating study sets our present conventions into crosscultural and historical perspective. She traces the curious history of quotation marks, examines the long tradition of quotation collections with their remarkable recycling across the centuries, and explores the uses of quotation in literary, visual and oral traditions. The book tracks the changing definitions and control of quoting over the millennia and in doing so throws new light on ideas such as imitation, allusion, authorship, originality and plagiarism.

Whatever Mike J. Aronson, 2021-09-27 *Whatever* is a book about you. *Whatever* will help you in your daily life. *Whatever* will also help you to help others. If Jerry Seinfeld can write a show about nothing and Cosmo Kramer can write a coffee-table book that turns into a coffee table, I can write a book about *Whatever*. We all have “stuff” we all need to learn how to deal with. We need to adapt in helping others with their stuff also. Many times, people don’t need physical help. They are just looking for someone to talk to and maybe get another perspective of the situation or someone whom they just needed to vent to. Be a good listener. It’s not always about you. When you help someone, chances are, you are helping yourself. At times, people just need some help. The littlest things can make such a big difference—a smile, a laugh, or even just opening the car door for someone. This book is over twenty years and a lifetime of observations, situations, and experiences I have had, and many you have had. The key element of *Whatever* is to help yourself first and then for you to pass it on to others. We are just a world of people helping people, and sometimes we need a little help. I hope you enjoy reading *Whatever* and have some laughs and smiles along the way. I know you have seen some of the writings and pictures before. Maybe now you will be able to look at your life differently. *Whatever* will help you do that and also for you to help someone else. Remember what they tell you on an airplane: “Secure your own oxygen first before helping others.” Enjoy your time.

Civil Peace and the Quest for Truth Murray Dry, 2004-01-01 Dry examines the U.S. Supreme Court's treatment of the First Amendment freedoms of religion and speech against the founding of the American Constitution and its philosophical underpinnings.

A Million Little Pieces of Feces Python Bonkers, 2006-02 (Selected excerpts and outside reviews can be found by clicking on the blue Python Bonkers hyperlink.) This book may share an alphabetical lineage with the Frey book, but there is no melodramatic redemption here -- it is not a parody of that book but its own entity. As one of the characters from the book says, We're still involved in the commission of the acts that will require redemption -- and those stories are always so much more fun. Bonkers and his bizarre team embarks on a gonzo tear through the streets of Los Angeles and across the pop cultural landscape as well. In his satirical quest for truth in journalism, and life, he must navigate through the many odd tiers of social class, in both the Southern California culture and in his Machiavellian office life and its absurd red and blue political divisions. This is no heart-wrenching tale of excess, its destination is hilarity, so it presses the pedal to the metal and takes no prisoners.

Who Needs Gay Bars? Greggor Mattson, 2023-05-30 Gay bars have been closing by the hundreds. The story goes that increasing mainstream acceptance of LGBTQ+ people, plus dating apps like Grindr and Tinder, have rendered these spaces obsolete. Beyond that, rampant gentrification in big cities has pushed gay bars out of the neighborhoods they helped make hip. *Who Needs Gay Bars?* considers these narratives, accepting that the answer for some might be: maybe nobody. And

yet... Jarred by the closing of his favorite local watering hole in Cleveland, Ohio, Greggor Mattson embarks on a journey across the country to paint a much more complex picture of the cultural significance of these spaces, inside big four gay cities, but also beyond them. No longer the only places for their patrons to socialize openly, Mattson finds in them instead a continuously evolving symbol; a physical place for feeling and challenging the beating pulse of sexual progress. From the historical archives of Seattle's Garden of Allah, to the outpost bars in Texas, Missouri or Florida that serve as community hubs for queer youth—these are places of celebration, where the next drag superstar from Alaska or Oklahoma may be discovered. They are also fraught grounds for confronting the racial and gender politics within and without the LGBTQ+ community. The question that frames this story is not asking whether these spaces are needed, but for whom, earnestly exploring the diversity of folks and purposes they serve today. Loosely informed by the Damron Guide, the so-called Green Book of gay travel, Mattson logged 10,000 miles on the road to all corners of the United States. His destinations are sometimes thriving, sometimes struggling, but all offering intimate views of the wide range of gay experience in America: POC, white, trans, cis; past, present, and future.

The New Mathematical Coloring Book Alexander Soifer, 2024-03-11 The New Mathematical Coloring Book (TNMCB) includes striking results of the past 15-year renaissance that produced new approaches, advances, and solutions to problems from the first edition. A large part of the new edition “Ask what your computer can do for you,” presents the recent breakthrough by Aubrey de Grey and works by Marijn Heule, Jaan Parts, Geoffrey Exoo, and Dan Ismailescu. TNMCB introduces new open problems and conjectures that will pave the way to the future keeping the book in the center of the field. TNMCB presents mathematics of coloring as an evolution of ideas, with biographies of their creators and historical setting of the world around them, and the world around us. A new thing in the world at the time, TMCB I is now joined by a colossal sibling containing more than twice as much of what only Alexander Soifer can deliver: an interweaving of mathematics with history and biography, well-seasoned with controversy and opinion. –Peter D. Johnson, Jr. Auburn University Like TMCB I, TMCB II is a unique combination of Mathematics, History, and Biography written by a skilled journalist who has been intimately involved with the story for the last half-century. ...The nature of the subject makes much of the material accessible to students, but also of interest to working Mathematicians. ... In addition to learning some wonderful Mathematics, students will learn to appreciate the influences of Paul Erdős, Ron Graham, and others. –Geoffrey Exoo Indiana State University The beautiful and unique Mathematical coloring book of Alexander Soifer is another case of “good mathematics”, containing a lot of similar examples (it is not by chance that Szemerédi’s Theorem story is included as well) and presenting mathematics as both a science and an art... –Peter Mihók Mathematical Reviews, MathSciNet A postman came to the door with a copy of the masterpiece of the century. I thank you and the mathematics community should thank you for years to come. You have set a standard for writing about mathematics and mathematicians that will be hard to

match.- Harold W. Kuhn Princeton University I have never encountered a book of this kind. The best description of it I can give is that it is a mystery novel... I found it hard to stop reading before I finished (in two days) the whole text. Soifer engages the reader's attention not only mathematically, but emotionally and esthetically. May you enjoy the book as much as I did!- Branko Grünbaum University of Washington I am in absolute awe of your 2008 book. -Aubrey D.N.J. de Grey LEV Foundation
