Threats Outskirts Press, 2018-05-07 There is one constant that reaches across relationships, religion, race, politics, the news, business, world affairs, and medicine—and this common thread is called a threat. A threat can strike fear, motivate, inspire change, crush, and rally people to do and act in ways that are not always predictable. Animals respond to threats physically, through noises, chemical releases, and physical changes in the body, driving a behavioral change in the animal. People who feel threatened are often driven toward action. So...are threats good or bad? Are they needed to drive certain behaviors? Are we stagnant or complacent without threats? Are we lawless without threats? Do we plan our lives around the promises of the future or around threats toward the future? Are our future and hopes dashed and drowned out by uncertainty and anxiety? One has to wonder if threats are essential to sustaining continual progress by mankind. Learn how the various sectors of society are affected by threats in this unique and thought-provoking study.

Training Across Multiple Locations Stephen Kreml, R. Wayne Pace, 2001-04-13 Provides practical solutions to the business problem of distributing training to multiple locations Introduces a new and practical way to use assessment to create a sustainable training and development function Shows how those involved with training and development can make bottom line contributions to the company Provides a model for calculating return on investment (ROI) for technology based programs In this era of rapid globalization, human resource development professionals in every type of organization face the problem of managing training and development across many different, often widely dispersed, sites. Training Across Multiple Locations offers a comprehensive, proven model for designing, building and assessing every aspect of a multiple location training and development (T&D) system. Stephen Kreml and R. Wayne Pace detail how to integrate training from multiple locations into a comprehensive organizational strategy, and how corporate training can align those multiple locations with a single corporate vision. Training Across Multiple Locations draws from numerous real-life examples to show how distance learning technology-including intra-nets, web-based training, and computer-based training-is being used to manage multi-point training at companies like Motorola, Ford, Boeing, Kinko's, Hewlett-Packard, and others. With technology, the authors reveal, training organizations are able to extend their reach and distribute training over a far wider audience in ways that

may make current approaches to training less relevant and even obsolete. And perhaps most importantly, they provide a model for calculating return on investment (ROI) for these technology-based programs. Krempf and Pace present a detailed review process for evaluating the effectiveness of multiple location training and development systems and provide specific advice on how to conduct the review and how to share data to enhance unit effectiveness. They also include a unique questionnaire that helps teams assess how well they are carrying out their T&D responsibilities and how well they are integrating their activities into the corporate business plan. Training and development functions survive by maintaining relationships with critical decision-makers at all levels in the organization. This process is often described in terms of politics and power-but Training Across Multiple Locations treats the issue simply in terms of how to get the job done. The unique process described in this book will encourage better preparation and more informed discussions and decisions, allowing managers to better anticipate problems and stay on top of key issues.
